Sequence 1, Application US/60172600
GENERAL INFORMATION:
APPLICANT: BONAZZI, VIVIEN
TITLE OF INVENTION: ISOLATED HUMAN G-PROTEIN COUPLED
TITLE OF INVENTION: RECEPTOR, NUCLEIC ACID MOLECULES ENC
TITLE OF INVENTION: PROTEIN, AND USES THEREOF
FILE REFERENCE: CL000178
CURRENT APPLICATION NUMBER: US/50/172,600
CURRENT FILING DATE: 1999-12-20
NUMBER OF SED ID NOS: 14
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              US-60-172-600-1

GENERAL INFORMATION:

APPLICANT: BONAZZI, VIVIEN

ITILE OF INVENTION: ISOLATED HUMAN ION CHANNEL PROTEINS,

ITITLE OF INVENTION: NUCLEIC ACID MOLECULES ENCODING HUMAN I

ITITLE OF INVENTION: AND USES THEREOF

FILE REFERENCE: CLOOOL63

CURRENT APPLICATION NUMBER: US/60/169,841

CURRENT APPLICATION NUMBER: US/60/169,841

CURRENT FILING DATE: 1999-12-09

NUMBER OF SEQ ID NOS: 2910

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 23

LENGTH: 558

TYPE: DNA

ORGANISM: Human

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 3, Application US/08943986
Patent No. 5963314
GENERAL INFORMATION:
APPLICANT: Edward M. Brown
APPLICANT: Steven C. Hebert
APPLICANT: James E. Garrett, Jr.
TITLE OF INVENTION: CALCIUM RECEPTOR-ACTIVE
TITLE OF INVENTION: MOLECULES
FILING DATE: 7-June-1995
APPLICATION NUMBER: 08/353,784
FILING DATE: 9 December: 1994
APPLICATION NUMBER: PCT/US/94/12117
FILING DATE: 21 October: 1994
APPLICATION NUMBER: U.S. 08/292,827
FILING DATE: 23 August, 1994
APPLICATION NUMBER: U.S. 08/141,248
APPLICATION NUMBER: U.S. 08/141,248
APPLICATION NUMBER: U.S. 08/09,389
FILING DATE: 23 FEBRUARY, 1993
APPLICATION NUMBER: U.S. 08/009,389
FILING DATE: 23 FEBRUARY, 1993
APPLICATION NUMBER: U.S. 08/0017,127
                                                                                                                                                                                                                                                                                                                                                                                                                             COMPUTER READABLE FORM:
MEDIUM TYPE: 3.5" Diskette, 1.44 Mb
COMPUTER: IBM PC DOS/MS-DOS
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: FASTSEQ
CURRENT APPLICATION DATA:
                                                                                                                                                                                                                                                                           APPLICATION NUMBER: US/08/943,986
FILING DATE: 03-0CT-1997
CLASSIFICATION: 530
PRIOR APPLICATION DATA:
APPLICATION NUMBER: 08/484,565
FILING DATE: 7-June-1995
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         2950
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        2376
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            2710
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            2650

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              DNA encoding calcium receptor polypeptide(s) - useful for therapeutic purposes, e.g. hyperparathyroidism and osteoporosis Claim 15; Columns 125-134; 174pp; English.

The present sequence encodes human parathyroid cell calcium receptor 4.0 (HuPCaR 4.0).

The specification includes details of molecules that can modulate one or more inorganic ion receptor activities, and antibodies and antibody fragments targetted to inorganic ton receptor proteins. I
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         19-AUG-1994;

Principle 27; Fig 49; 174pp; English.

Protein. The tissue from which the receptor and receptors from bovine protein. The tissue from which the receptor and receptors from bovine parathyroid and rat kidney are derived, respond to changes, and control control control and rat concentration, e.g. parathyroid hormone regulates changes, in calcium ion concentration, e.g. parathyroid hormone regulates calters through changes in Ca2+ levels in juxtaglomerular and proximal cubule cells in the kidney. The purified receptors (produced recombinantly) can be used to screen for compounds that modulate calcium receptor activity, especially those that can be used to treat diseases associated with the receptors in these tissues. They can also be used to raise antibodies for use in detection assays.
